## EXPERIENCE

### Mentor

#### VES Institutions

June 2022 – Ongoing

Thoothukudi, TamilNadu, India

- Part-time Role which i handle ; Handling Classes, Debugging, working with projects, office management, solving a real time errors related to computers.
- Gain a lot of knowledge from there like problem solving , handling customers , knowledge sharing to the students .
- Little Achievement from my side implementing ideas in new tech knowledge to gain the outcome more and much enough.

### Freelancer

January 2023 – Ongoing

- Web development works, marketing stuffs..etc.
- Helping final year students with their projects.
- Lots of portfolio works
- Manage the company deployment process, managing Data too.

## PROJECTS

### Tickets confirmation

#### INDIAN RAILWAY

Using a deluge programming language i created a Tickets confirmation clarifying project which is used to the people who books tickets , which is in pending list .

### E-Commerce

#### Supplements/gym company

I've created a shopping platform which handles the sales and Administration of the products it helps the company to easy handle the customer and products by single handed

### Connection B

#### EXIM/shipping company

I've created communicating platforms between the traders which helps them to connect more through the internet and verify the products which is shipping to them .

## MOST PROUD OF

### Summary

Detail-oriented tech enthusiast with a passion for troubleshooting software and hardware issues. Proven ability to resolve customer inquiries, provide clear instructions, and simplify technical jargon for non-tech users. Equipped with strong knowledge of OS, networking, and remote support tools."

### Technical Knowledge

" Provided remote support for users running Windows and Linux OS, solving issues related to system errors and application crashes."

### Solving Mindset

"Solved persistent boot issues for Linux systems on a personal project, ensuring efficient and error-free operation."

### Debugger

I placed 3rd position in the National level Debugger competition in 2023

### Opensource Contributor

I've been customizing it heavy with Git commands, handling Fedora like a pro. I've got that slick terminal game going, running commands and getting Hyprland to match common style for all. I've even rolled with different kernel versions, keeping everything updated, and I've managed to pull off some complex configurations like a boss.

## STRENGTHS

Hard-working

Eye for detail

Motivator & Leader

Connection building

C

java

Spring boot

Python

Customising OS

Exploring Linux
